PARAM[®] FIT-01 Film Impact Tester

Labthink

FIT-01 is professionally applicable to the determination of impact resistance properties of pendulum of plastic films, sheets, composite films, aluminum foils and other materials.

Professional Technology

- Adjustable range and electronic measurement support various combinations of non-standard test conditions
- Pneumatic specimen clamping, pendulum release mechanism and horizontal adjustment system effectively reduce the errors caused by manual operation
- The system provides automatic statistics of testing data for users' convenient viewing
- The instrument is controlled by micro-computer, with LCD, menu interface and PVC operation panel
- Supports LystemTM Lab Data Sharing System for uniform and systematic management of test results and test reports

Test Principle

The impact resistance of films could be obtained by measuring the energy consumed by hemispheric impact head to make films ruptured, under the certain impacting conditions.

This instrument conforms to various national and international standards: GB/T 8809, ASTM D3420, NF T54-116

Applications

This instrument is applicable to the determination of impact resistance of:

| | Including plastic films, sheets and composite films e.g. PE/PP composite films, aluminized |
|--------------|---|
| Basic | films, aluminum plastic composite films and nylon films for food or drug packages |
| Applications | Including paper and paper board, e.g. aluminized paper for cigarette packages and Tetra Pak materials |
| Extended | Test range could be extended to 5J |
| Applications | |

Technical Specifications

| Specifications | FIT-01 |
|------------------|---|
| Impact Energy | 1J, 2J, 3J (Standard) |
| Resolution | 0.001J |
| Impact Head Size | Φ 25.4 mm, Φ 19 mm, Φ 12.7 mm (Customization is available) |
| Specimen Clamp | Φ89 mm, Φ60 mm |
| Diameter | |

Configurations

| Standard | Instrument, Pendulums of 1J, 2J and 3J, Standard Impact Heads of Φ 25.4mm and Φ 19mm, |
|-----------------------|---|
| Configurations | Standard Clamp Plates of Φ 89mm and Φ 60mm (including O-ring) and Micro Printer |
| Optional Parts | Professional Software, Communication Cable, Customized Impact Head and O-ring |
| NIada | 1. The gas supply port of this instrument is $\Phi 6 \text{ mm PU Tubing}$; |
| Note | 2. Customers will need to prepare for gas supply. |

Please Note: Labthink is always dedicated to the innovation and improvement of product performance and function. Therefore, technical specifications are subject to change without further notice.
