

GenScript's Protein Analysis Workflow

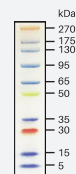

SurePAGE Bis-Tris Precast Gels

- Fast run times of **20+ Min**
- Cost savings with high performance and better resolution
 - Includes FREE MES or MOPS buffer
 - GenBox Gel Tank Available

Protein Standards

- Achieve clean, sharp protein bands for accurate MW
- Wide selection for SDS-PAGE and Western blot

eStain® L1 Protein staining System

- Stain and de-stain 2 mini gels in **10 Min**
- Sharp stained protein bands and sensitivity ≥ 12.5 ng
- Protein staining results that are equivalent or better to traditional staining methods

eBlot® L1 Protein Transfer System

- Achieve complete transfer in **9-17 Min**
- Results are equivalent to traditional wet transfer
- Outstanding performance for small, medium, and large proteins

eZwest™ Automated Western Device

eZwest™ is a fully automated Western Blotting device completing the entire process of blocking, antibody incubation and washing steps. The device is easy to use and has minimal footprint.
